

BIOPRO Product Flash and PowerPoint Presentation Script

1) The Biofield:

It has long been known that the Earth has a powerful, life-enhancing energy field that powers it. So do YOU! The National Institutes of Health have named this fascinating energy in and around the human body, the **BIOFIELD**. The Biofield is the

collective energy that emanates throughout every single cell, tissue and organ that makes up your body. The Biofield is your body's life-enhancing Energy and that Energy is Life!

Collectively, the **Biofield controls your body's entire energetic systems** much in the **same way** as your **heart controls your circulatory system** and your **lungs control your respiratory system**. As unique to you as your **signature or fingerprint**, your Biofield or "Energy Organ" is not only fundamental to how you look and feel, but it is also extremely important to your total health and wellness....in particular the rate at which your body ages overtime.

Your **Biofield** is essentially like a **series of muscles**. The **bigger they are, the stronger they are** – so long as they are able to work together. The stronger and more coordinated your Biofield the **more efficient** your body is in **resisting against external stressors**.

2) Stress and Electropollution

External stress comes in many different shapes and forms. **Physical, Psychological and Financial stress** are ones you may think of first, but another stressor, **Electropollution**, is one that is causing great concern among medical experts. Like cholesterol is damaging to the heart and cigarette smoke is to the lungs, **electropollution is extremely harmful to your Biofield**, and as a

result, to your overall well-being. Electropollution comes from every wired and wireless device we use today, from our cell phones and computers to our televisions and microwaves. These antagonistic energies saturate our personal environment, and in the process **disrupt, deplete** and in some cases, completely **overpower your Biofield**. When the Biofield becomes weakened, you become more vulnerable to the health effects related to the daily stresses of living in the modern world.

The effects of Biofield damage can be seen and measured in a **chain reaction of physiological events** expressing themselves as a **variety of stress responses**.

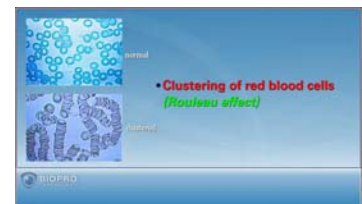

A **measurable stress response** occurs when the human body is exposed to external stressors. Think of your body's response to stress as driving your car through a stoplight. When stress is absent, all lights are green and your body is working efficiently. When stressors, such as those from electromagnetic fields (EMF) or electromagnetic radiation (EMR)-emitting devices, are present, it's like lights turning red and **your body literally stopping to work efficiently**.

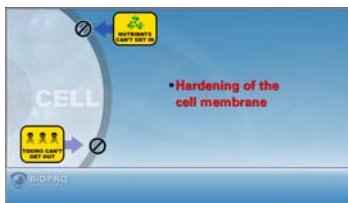

In some cases, such as when pressing a Cell Phone against your head or body, the stress may even induce **blood flow changes** that present themselves as **excessive heat** in your tissues or organs. Blood vessels constrict, the blood flow through the vessels becomes faster and **stress-induced heating occurs**. When a stressor like a cell phone is present, it is sometimes possible to measure the induced heat, versus seeing the absence of that effect

when the stressor is not present.

At the blood level, stressors may also trigger a **clustering of red blood cells**, which is called the *Rouleau Effect*. This clustering disrupts the body's natural blood flow that may lead to a number of other health issues.

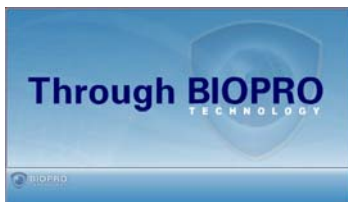

And, at the cellular level **stress compromises intercellular communication** so that cells cannot talk to each other and do their jobs together. In addition all these stresses cause **cell membranes** to effectively “**harden**” creating a fundamental disruption in your body's metabolic processes. The result - harmful **toxins become trapped in your cells and vital nutrients cannot**

get into your cells, leaving you more vulnerable to illness and disease than ever before.

Now, you know why **electropollution has been called the greatest threat to our health in the 21st Century**.

3) The Good News – BIOPRO Technology

The good news is that **you have the power to effectively reduce the impact of external stressors**, as well as **strengthen the efficiency of your Biofield** allowing you to take control of your wellness, and still enjoy the conveniences of the modern world.

Through a **New Generation of Wellness Solutions**, **BIOPRO is taking the world by storm**, delivering the world's first custom designed, cohesive suite of products to both counteract the energy-depleting effects of electropollution and keep your Biofield working efficiently.

Comprised in three categories, **Personal Environment Products**, **Body Worn Products** and a **one-of-a-kind Nutritional Regimen**, each product is designed to target specific stressors, yet to work synergistically with one another for maximum results.

What powers BIOPRO products are **innovative** and **scientifically substantiated** technologies – **BIOPRO's proprietary ERT™ (Energy Resonance Technology) and the patented, proprietary MRET® (Molecular Resonance Effect Technology).**

MRET® effectively **reduces** the **impact of external stressors** and **electropollution**. **ERT™** dramatically **enhances a person's ability to compensate for the damaging effects** of external stressors and electropollution.

MRET® is a **patented, proprietary noise-field nano-technology**, which has been **substantiated in Medical Centers, Universities and Laboratories** across the world.

Powered by a **hi-tech polymer**, the particles within the **MRET®** compound - once **stimulated by EMF/EMR** - oscillate, **emitting a low frequency noise-field that superimposes itself over the harmful high-frequency microwave radiation.**

Studies have shown that this process creates an **incoherent, bio-friendly wave**, thereby **dramatically reducing** the otherwise **inappropriately triggered** protective responses by the body's key systems.

ERT™ is BIOPRO's **proprietary subtle energy technology**. It is substantiated by **Independent Researchers, Peer-reviewed studies**, etc. **ERT™** powers BIOPRO's various **subtle energy carriers**. While the presence of EMF/EMR disrupts communication across a person's biofield, **ERT™-charged carriers emit a subtle energy field, restoring vital communication** across the biofield by assisting the transmission of signals that improve resistance to stressors and support key energetic functions in the body.

In summary, the **patented, proprietary MRET®** **works hand-in-hand with BIOPRO's proprietary ERT™**, enabling a **unique, dual-action effect** for the product user. While **MRET®**

works specifically on greatly **reducing the impact of electropollution** on the body, ERT™ is designed to substantially **improve the body's ability to compensate for damage caused** by external stressors such as electropollution.

Research indicates that by **wearing, (nutritionally) consuming and surrounding yourself** with MRET®/ERT™ powered products, communication across your body's Biofield is greatly enhanced and strengthened, thereby improving the efficiency of all key processes. This effect is achieved through **cutting-edge Molecular and Energetic Resonance** between the MRET®/ERT™ charged product and your body's key energy systems.

3) BIOPRO Product Categories

a) Personal Environment Products

Your **personal environment** is one of the key areas where overexposure to electropollution can occur. The majority of us spend most of our waking and sleeping hours at home, at the office or in the car. That's why BIOPRO has developed a suite of **Personal Environment Products** and custom-designed product packs to help you play it safe in your space.

One of the most prevalent electropollutants today is the **Cell Phone**. With two billion people worldwide (and growing) using a cell phone on a daily basis, the potential health risks are fast becoming an epidemic. To intervene into this emerging problem, BIOPRO has developed the dual-action **BIOPRO Cell Chip**. It assists in **addressing the negative impact of EMR** by changing the characteristics of the electromagnetic field **emitted by your Cell Phone** as well as **other EMR emitting devices**, such as **PDAs, Bluetooth headsets**, etc. through a passive noise-field, created by the **patented, proprietary MRET® polymer**. In the presence of external electromagnetic fields, the BIOPRO Cell Chip also emits a **subtle energy field** that energetically resonates with the human Biofield.

For those who use their cell phones when driving, **for both convenience and safety** BIOPRO has developed the unique **Hands-Free Airtube Headset**. This breakthrough innovation in the field of cellular headsets uses a **patented air tube design**, replacing the conventional wires used in most headsets that attract ambient radiation directly back to your head. Thus, the **BIOPRO air tube headset assists in dramatically reducing radiation exposure**.

Electropollution is everywhere you live, work and play. In fact, every single wired and wireless device you use is silently emitting EMFs or EMR throughout your personal environment, thus quietly

sabotaging your Biofield. While it is always best to avoid these exposures, often times they are unavoidable.

To change the impact of this direct exposure, BIOPRO designed the cutting-edge **BIOPRO Universal Chips**. This revolutionary dual-action noise field nano-technology is charged in such a way that the **same chip can be applied on various types of electronic devices, high-tech gadgets, household appliances, and more that you and your family use every single day.** The Universal Chip is truly the most convenient and easy way to live well in your home, office or car.

The **electrical outlets in your home and/or office** power everything you use and, in the process, they **emit significant electromagnetic fields** that also **severely impact your Biofield**. In fact, research has shown that these fields significantly disrupt the sensitive signals with which our brains and nervous systems communicate. The results are never before seen allergies, illnesses and deteriorating health for adults, children and pets. In our homes and offices we make key life decisions about family, career, finances, etc. and that's why it is so important to safeguard the energetic state of your home and body with the **BIOPRO Home Harmonizer**. **It uses no electricity, plugs into any standard outlet and covers up to a 60 foot area.** Powered by BIOPRO's proprietary ERT™, this innovative device is the result of intensive research and development to enhance your high-tech surroundings and restore your Biofield to optimal performance levels. **Combined with the BIOPRO Universal Chips** as part of BIOPRO's **Home and Office Essentials Pack**, the Home Harmonizer is the smart choice for modern day living and working environments where avoidance of exposure is impractical or impossible.

b) Body Worn Products

While it is always best to avoid or minimize exposure to electromagnetic radiation as much as possible, sometimes exposure is unavoidable. To address the **degradation and interference with essential communication across your Biofield** on a daily basis where you can't avoid or minimize exposure (for example when leaving your BIOPRO-proofed home or office), you need a **'Biofield bodyguard'**. For that purpose,

BIOPRO has developed the most advanced **Body Worn Product** yet to improve the body's resistance to stressors such as electropollution. The **BioLife Pendant** uses ERT™ to **amplify your Biofield's healthy energy states** and, at the same time, **decrease the energy depletion caused by a wide variety of stressors** including the troubling effects of EMF's and EMR's. Worn directly on the body, the BIOLife pendant **interacts synergistically with your Biofield**. As a result, communication across your body's Biofield is greatly enhanced and strengthened, impacting the efficiency of all key processes, keeping you and your Biofield in top shape.

c) Nutritional Regimen

The threat to your Biofield occurs as much on the inside as it does on the outside. New research indicates that **electropollution** and **other stressors** can **greatly impact your nutritional health**. Today's scientists are seeing a unique connection between **nutritional deficiencies on the cellular level** and how our **exposure to electropollution** may be one of the leading causes of those deficiencies.

It appears from the research that these **stressors fundamentally disrupt the metabolic processes** in such a way that **vital nutrients can't get into the body** and **toxins can't get out**. To make matters worse, our food supply is lacking nutritional value due to over processing and soil depletion and most of us don't consume the daily requirements for necessary vitamins and minerals. Realizing the inefficiency of traditional nutrition in addressing the growing nutritional problem related to electropollution, **BIOPRO** has raised the bar **delivering the first-ever custom designed Nutritional Regimen** to dramatically **counteract the energy-depleting effects** of these types of external stressors.

BIOPRO's Nutritional Regimen is comprised of four scientifically advanced nutrition-optimizing products that collectively make up the **BIOPRO Nutrition Essentials Pack**. All of these products share the **powerful energetic benefits of BIOPRO's ERT™**. The regimen's first product - **VitaTonic** - is truly the world's first tonic to **counteract the energy-depleting effects of electropollution**. Unlike any other drink in the marketplace today, VitaTonic **virtually eliminates the need for most other nutritional products in the daily diet**. Its powerful nutritional ingredient formulation was designed with your Biofield in mind, and **its liquid form allows for improved and faster absorption of essential detoxifiers and energizers into your system**.

Another key product in the BIOPRO Nutritional Regimen is **BioProduce**. A superior nutritional formulation, BioProduce is a **highly concentrated whole food supplement bursting with the amazing health benefits** of Mother Nature's most life-enhancing **fruits and vegetables**. Power-packed with **natural food actives** and BIOPRO's proprietary ERT™, BioProduce's unique formulations **work synergistically throughout your body and your Biofield** to ensure you and your family receive the essential nutrients for total well being in today's electropolluted world.

For those moments when you are faced with **extreme stress** in your life, BIOPRO developed an emergency stress formula called **P2R**. A nutritional optimizer, P2R - which stands for **Prepare to Repair** - is considered to be the **ultimate stress-repair formula** available, containing the **patented prickly pear cactus extract called Tex-OE**. It is designed so you can customize your intake based on whether your **exposure to external stressors** is **low, medium or high**. High stress events, such as long travel on an airplane or car, strenuous physical exercise, long nights out, or extended exposure to high levels of electropollution are where P2R shines. Under these highly stressful conditions, the body feels tired and your Biofield struggles to recover from these stressful situations. By taking **P2R before the stress event**

occurs it prepares the body to repair quickly, restoring the Biofield to a healthy pre-stress state and gets your mind, body and spirit back on track.

For the ultimate optimization of nutrient delivery, BIOPRO created the *BIOPRO SmartCard*, a true revolution in bioenergetics. Through the power of ERT™, the Smart Card transfers superior energy boosting properties to any liquid placed on it, greatly enhancing its flavor and taste and in the process, preparing your Biofield for its maximum enhancement. BIOPRO recommends using the SmartCard to enhance water or healthy fruit or vegetable juices you use when following your regimen to receive optimal nutrient delivery.

So with all the tremendous BIOPRO product choices at your fingertips, what's the best combination of products to start you on the path to optimal wellness? The **BIOPRO Personal Enhancement Pack**, consisting of:

1. *BioLife* Pendant
2. BIOPRO Cell Chip
3. VitaTonic (32 oz. bottle)

This product pack **combines a key product from each of the three BIOPRO product categories**, providing you with **essential interventions** for every aspect of your daily exposure to life's most pervasive stressors.

Summary:

The world of yesterday, of sock hops, drive-ins and ice cream socials has been replaced with an exciting world of video dance games, DVD players in our cars and text messaging on our cell phones. **Today, we are exposed to 100 million times more electromagnetic radiation than our great grandparents were.** This overexposure is **weakening the efficiency of our Biofields** so dramatically that it's beginning to take a **huge toll on our wellness.** Today, more than ever, people report feeling **lethargic, tired, unfocused, and more susceptible to illness and other symptoms.** It seems electropollution is taking over our lives, our communities and our world.

But one company, **BIOPRO Technology**, is empowering **YOU** to take control of your world by giving you the tools to live well, thrive and prosper in this complex, yet exciting new world.

Through **innovative and scientifically substantiated technologies**, BIOPRO's **proprietary ERT™** (Energy Resonance Technology) and the **patented, proprietary MRET®** (Molecular Resonance Effect Technology) and its, **hundreds of thousands of people around the globe are already experiencing that life with BIOPRO.**
