

Congratulations on your *i-H20*TM System purchase!

Set-up Instructions:

1. Remove unit from box.
2. The activator of your *i-H20*TM System is placed in the lid upside down. Remove the activator and place it right side-up so that the red indicator light shows on top of your device.

Usage Instructions:

1. Remove the activator unit covering the *i-H20*TM pitcher.
2. Fill the *i-H20*TM pitcher with water, preferably filtered water (not tap water).
3. To activate your water: Place the activator unit on top of the *i-H20*TM pitcher and plug the activator into an electrical outlet for 30 minutes.* The red indicator light on top of the activator will blink during activation. After 30 minutes of activation, disconnect the cable from the electrical outlet. Your water is now activated.
4. Enjoy your *i-H20*TM experience!

* Activating the water for over 30 minutes does not offer additional benefits. Please note that your *i-H20*TM activator is designed to perform approximately 14,400 activation sessions of 30 minutes each. This is equivalent to one activation per day for approximately 39 years.

PLEASE NOTE: *i-H20*TM offers exceptional hydration for your body, which your body may not be used to. We recommend you easing into your *i-H20*TM experience over a period of several weeks by starting slowly and working your way up to the maximum recommended amount of 3 glasses (24 fl.oz.) of *i-H20*TM per day. If you are currently ill, or under the care of a physician, please consult your physician before incorporating *i-H20*TM into your life.
